Experiment/Case Study No : 11

Aim:

Use JavaScript timers (setTimeout(), setInterval()) and ES6 modules (import/export) to build a dynamic countdown or class scheduler with real-time updates and responsive layout.

Software/Tools Required

- Visual Studio Code
- Google Chrome (Web Browser)

Experiment Program Code

1. Index.html

```
<!DOCTYPE html>

        <h1>Smart India <span>Hackathon</span></h1>
```

The World's Biggest Open Innovation Model. Empowering young technical minds to solve real-world problem statements from ministries, departments, and top industries.

<section id="about" style="scroll-margin-top: 100px;">
<h2 class="section-title">About the Initiative</h2>

Smart India Hackathon is a nationwide initiative by the Ministry of Education's Innovation Cell to provide students with a platform to solve pressing challenges faced in daily operations. It fosters a vibrant culture of product innovation, collaborative development, and problem-solving mindsets among engineering, technology, and management institutes across the nation.

</section>

<section id="themes" style="scroll-margin-top: 100px;">
<h2 class="section-title">Focus Themes</h2>

<h3>Smart Automation</h3>
Focusing on next-generation industrial architectures, IoT ecosystems, predictive maintenance paradigms, and intelligent production line automation frameworks.

<h3>Agriculture & Rural Dev</h3>
Delivering cutting-edge technical infrastructure to operations, smart supply chains, drone analytics, and data-driven yield optimization maps.

<h3>Clean & Green Energy</h3>
Building clean tech solutions aimed at renewable power grids, carbon capture models, battery optimization systems, and smart waste management routines.

</section>

<section id="achievements" style="scroll-margin-top: 100px; margin-top: 60px;">
<h2 class="section-title">Key Achievements</h2>

Over successive grand iterations, SIH has catalyzed a significant surge in

```
student-led startups, patent registrations, and commercial product conversions. It has successfully bridged the gap between theoretical classroom code bases and deployment-ready industrial software frameworks.</p>
